Safety is valued

During the decades after the government changes work, fire and environment safety has experienced a significant transformation in their perspectives. The shaping of a safe work environment which does not put health in danger, there is not just concern of an authority visit to a site or getting a fine, but to prevent the chances of accidents and environmental damages, to make sure the workplace is secured. A human life is value and we represent firmly this perspective, that it must be protected.

Szabolcs Mészáros
Managing Director

Balázs Németh
Sales and Technical Director

Nowadays, individuals that are involved in the agricultural cycle their main goal is to catch up and to keep the competency, on a more globalized market. I believe because of this to protect an individual, environment and material possessions are crucial factors, which need to be ensured on a regular basis to gain market share and to gain advantage for the enterprises.

Our versatile team can undertake & integrate work, fire and environment protection tasks on subfields, to provide safety for the operation of different organizations.

WENFIS Engineering Office LTD. is a fully Hungarian owned firm, established by engineers and ran by engineers and as it's leaders we have set a clear goal that we must provide full and high quality solutions to our partners related to work safety, health-safeguarding, fire and environment safety. The regulations in connection to our activities, the quality and professional level of our colleagues is proven by years of practical knowledge.

Official permits:

Work Safety Engineer
Work Safety Specialist
Work Safety Technician
Safety Engineer
Transport Operator Engineer
Electrical Engineer
MIR, KIR, MEBIR internal auditor

Hazardous goods / ADR support
EFR First Aid Trainer
Fire Safety Operation Engineer
Fire Safety Trainer
Fire Safety Main Instructor
Fire Safety Specialist
Fire Extinguisher Maintainer
Fire - Water Source Reviewer

Installed fire extinguisher maintainer
Installed fire alarm system maintainer
Environment Engineer
Environmental Management Engineer
Environment Researching Geographer
Environmental Safety Specialist
Environmental Safety Product
Fee Administrator

Work safety, work healthcare

The main target of our work safety actions is to protect human life and to prevent accidents. We value to build an environment at the workplace, which is not dangerous for health, its safe and to filter any kind of violations or shortages, which can be the basis of an authority fine during a review. Our functions extend to work safety in full.

Workplace risk evaluation and chemical estimation

The aim to evaluate risk at the workplace is to identify the factors which could cause harm, damage or an illness to the individuals performing the job. Furthermore, it must define the extent of risk, must suggest an action plan to prevent the estimated risk and to decrease it to an acceptable level on objective, personal, organizational levels however where not possible, using technical protection, and by providing other protective equipment.

Work safety training, elaborate training programmes and syllabus

To hold a work safety training is a duty by law for every employer. Although it doesn't need to be a dry, listing regulations and references and monotone but it can be interesting and practical, to the point!

Safety and health-safeguarding coordination, prepare be plan

At the construction sites - where usually there are a large amount of people at one given time, doing different kind of tasks, which follow one another - the adequate cooperation, to reach that coordination is a necessity. The lack of professional coordination causes the deadliest accidents in the construction industry. Thanks to having numerous projects under our belt, we possess a suitable professional experience.

Measurements in connection to work safety

To make the work environment a safe one, decreasing the factors which are harmful to the employee's health is crucial. The non-suitable environment greatly influences the employee's concentration and productivity.

Part of our service is to measure work environments (air conditioner - air technology appliances, noise level and measuring light level). We work with top quality measuring equipment.

Assess the requirement of individual protective equipment, selling protective gear

We can contract to measure the need of workplace, technological, individual protective equipment, to setup the provision of these equipment and to make sure these can be purchased on a suitable price.

Further work safety functions:

- Hold regular work safety reviews, produce reports, manage the identified shortages
- Assess workplace accidents and injuries
- Organize workplace first aid training
- Prepare workplace regulations
- Occupational health and safety management systems (MEBIR) development and audit
- Electrical Standards - review, complete repairs
- Putting into action dangerous, hazardous machines & goods
- Perform periodical reviews on safety
- Prepare business continuity plans
- Mark the CE signs on machines
- Work safety specialist functions
- Represent the interest in front of authorities

DUE diligence audit (DDA) studies

Work safety, fire-safety, environment safety,
ADR-RID, Environmental Safety Product Fee

The term “due diligence” is an English phrase, which means “required care”. The EHS area must be part of the “due diligence”, when reviewing a company and during this process by investor mandate, professionals look into the company’s contracts, permits, registers, they review the applied technology in detail and with special attention they review the environment safety, fire-safety, ADR-RID, background of processing an Environmental Safety Product Fee, in line with upkeeping criteria.

The EHS area “due diligence” is required because the investor firm, must be reassured the information given to them is valid and correct. Unfortunately, an aspect which goes out of scope can cause serious problems later to the organization (e.g.: functioning without an environment safety permit OR not identified / not reviewed assessments, maintenance, etc.)

Compliance Audit (CA) - adequacy audit

Work Safety, Fire-Safety, Environment Safety,
ADR-RID, Environment Safety Product Fee

The audit is performed in accordance with a complex audit plan in line with authority review scripts, review points and our own, as well as in a multinational environment, also in the KKV sector and with almost 10 years of experience gained in the public sector, aligned with the practical experience and also the record of questions. We sample the lawful suitability of work, fire, environment safety, ADR-RID, environmental safety product fee with supervising the procedures and functions by visiting sites, surveying, interviewing and by assessing the validity of the documents prepared plus the employer internal rules. The audit report details and evaluates the samples, interviews, the completion of duties as per the documentation and the recorded mismatches, also the comments, suggestions and in a summary chapter, it details the experiences.

BCP Audit

Business Continuity

The Business Continuity Plan, management is such a procedure during which a company prepares for a critical incidence and to prevent the stoppage of crucial business flow or if it happened to get back on track with the smallest delay possible and to prevent future losses. The BCP is a description of this, how to keep a business function when interrupted and after. We are currently in the process of audit for this, having a close review to processes, realizing the practicability enclosed.

Fire-safety

Fire-Safety training, prepare these training programmes, fire alarm drills organization

The fire-safety rules must be introduced to the employees and the individuals that come to a connection with the firm performing the business (e.g.: students, guests, tenants). During our trainings we approach with a practical point of view all preventive, fire extinguishing task introductions.

Fire-Safety Examination - at your site as well!

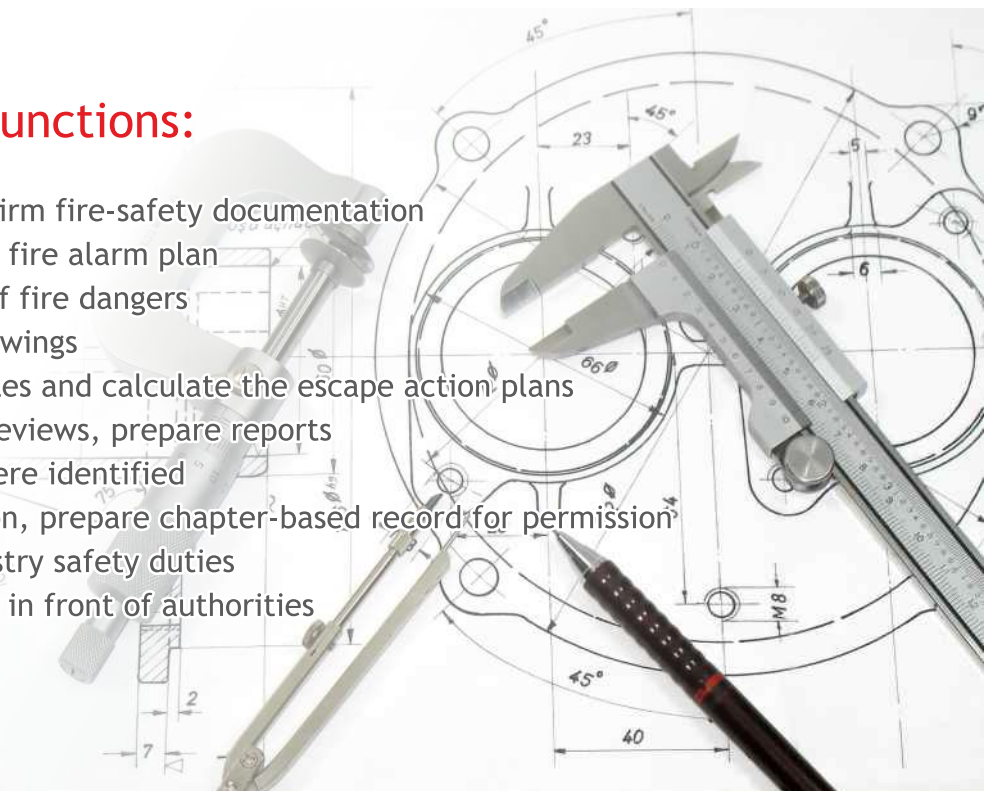

As per the industry sectors outlined in order 45/2011. (XII. 7.), also according to job descriptions functions can only be performed by an individual who is having a valid fire-safety qualification.

Furthermore, an individual must possess a professional qualification even if they are just controlling the person doing their task.

At our site, we regularly organize to as many sectors as possible, fire-safety examinations. If a company meets the defined classroom number, we can organize these at their site as well, the training and the examination both.

Further fire-safety functions:

- Complex, prepared to a firm fire-safety documentation
- Prepare fire-safety rules, fire alarm plan
- Prepare a classification of fire dangers
- Prepare escape route drawings
- Point out the escape routes and calculate the escape action plans
- Hold regular fire-safety reviews, prepare reports
- Manage shortages that were identified
- Fire-Safety documentation, prepare chapter-based record for permission
- To perform fire and industry safety duties
- To represent the interest in front of authorities

Fire Extinguisher Appliances maintenance and marketing

To increase our competitiveness, our company in the past had done a major upgrade of equipment, tools and investment. As a result of this we provide a wide spectrum of services connected to fire extinguisher appliances.

What we can do:

- To maintain the fire extinguisher appliances and the source of water
- To test pressure of fire extinguisher appliances
- Fire-water networks, fire-water pool reviews, repairs
- Measure discharges of water networks
- Review dry cables, test pressure
- Construct fire alarm and extinguisher systems, implement, maintain
- Calibrate industrial gas sensors, periodical maintenance
- Implement doors that prevent fire, review
- Implementation works done professionally

We work with a **short contract time**, precisely and perform thorough assessments. We keep a record of Your fire extinguisher appliances, from which if further reviews are required, we notify yourselves.

Sold Products:

- Fire Extinguisher Appliances and accessories
- Fireplug
- Fireplug cabinets
- Fire Hoses
- Fire “beam-pipes”
- Fittings, parts
- Fire-safety signs, plates
- After-glow systems

Environment safety

To match the economic competitiveness and the environmental protection is difficult for many organizations, which wants to meet the lawful criteria in a way to increase their market strength.

Instructed services related to Environment Safety:

- Spark companies according to environment safety, hold regular reviews, prepare reports, manage the identified shortages, prepare improvement plans
- Environment Safety avowal, data service (LAL, LM, FAVI, HIR, KAR, MIR, VAL, VEL, OSAP, VKJ) preparation, calculate fees for air, water and surface load
- To prepare a waste management record system, maintain
- Organize, schedule, action, review environment safety measurements
- Prepare official requests to hand in for permissions, extend current permissions, process the permitting (waste management, air-quality protection, water-law permits, function permits, etc.)
- Hold trainings, prepare regulations
- Follow-up lawful standards and the completion of authority instructions
- Keep in contact with environment safety authorities

Environmental Protection Licensing, overview, planning, advice

- Licensing of prior examinations, environmental-effect review or unified environment usage
- Environmental Protection Overview, Unified Environment Usage License (IPPC)
- Self-checks, site water-quality damage prevention plan, overview
- Construction documents, site permits, and environment protection permits
- Identify polluted areas, free from harm
- Water-right license, planning
- To attend to waste management tasks
- Calculations to determine air-quality, measurements, investments
- Plan to protect noise level (local measure, define areas affected by noise, request of noise level emission, licensing)
- Environment teaching, form awareness
- Building Energy Certificate

As per ISO 14001 standard Environmental management systems (KIR) construct, introduce, prepare for audit

In the future, companies who strive for competitiveness cannot leave out the fact that after quality control, environment became a crucial factor. To implement the environment awareness, the managements have a great tool at their disposal in terms of introducing and functioning the KIR system, because an effectively ran system like this which is centred around the environment will ensure the supervision of the environment procedures and activities, their evaluations and continuous improvement which can be upheld.

For Local Governments

- Environment Protection Events
- Prepare and overview Local Agenda 21
- Prepare evaluation of environment status
- Perform environmental examinations

Processing the environment safety product fee

In Hungary since 1995, there is a regulation in effect for environment safety product fee. The purpose of this law is to take part in preventing environment pollution, also to decrease it, to encourage for saving resources in agriculture to support the activities in correspondence.

Required to pay product fee:

- Batteries
- Wrapping tools and other wrapping means
- Other petroleum products
- Electrical and electronic appliances
- Tyres
- Paper carrying advertisements

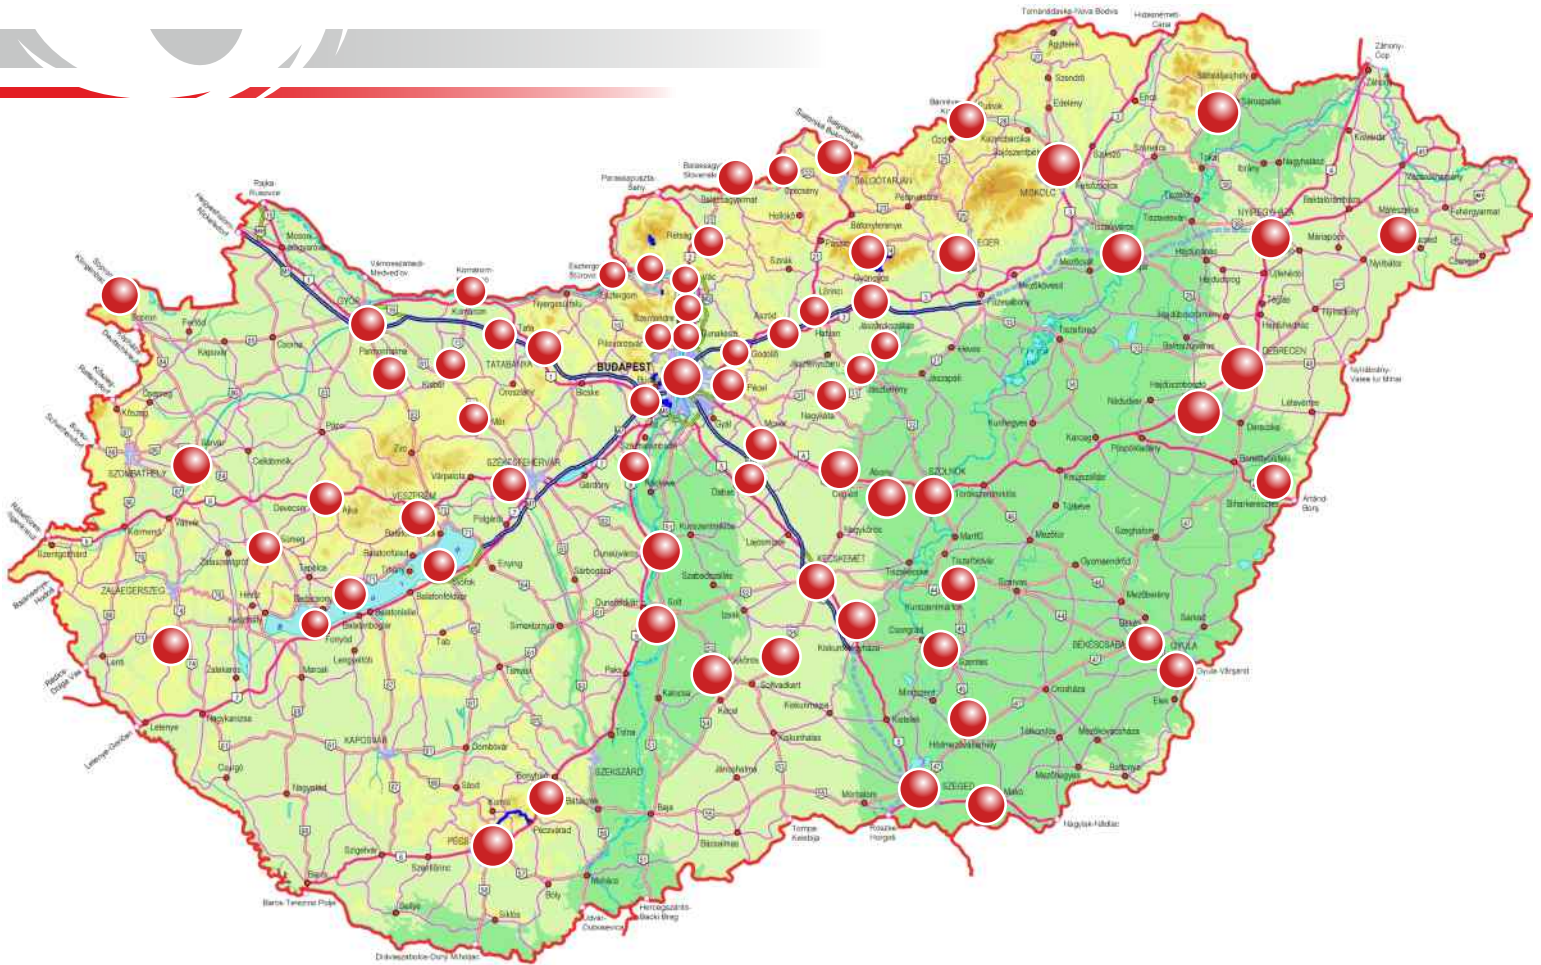

Our Services:

- Product Fee Representation
- Identify products which require this fee
- To complete notification duties
- To create record keeping systems
- To create avowal, send them in
- To optimize the systems on a regular basis and decrease cost
- Follow lawful standards
- Training
